Contents of Volume 56

Volume 56 No.1/2

From the Editors 1

T. S. Blyth and J. C. Varlet / The dual space of a finite simple Ockham algebra 3

R. Cignoli / Free Q-distributive lattices 23

David M. Clarc and Jürg Schmid / The countable homogeneous universal model of B_2 31

B. A. Davey and H. A. Priestley / Optimal natural dualities for varieties of Heyting algebras 67

H. Gaitan / Representation of finite Demi-p-lattices by means of posets 97

Hector Gramaglia and Diego Vaggione / Birkhoff-like sheaf representation for varieties of lattice expansions 111

Georges Hansoul / Priestley duality for some subalgebra lattices 133

David Hobby / Semi-DeMorgan algebras 151

Nestor G. Martinez / A simplified duality for implicative lattices and l-groups 185

Alejandro Petrovich / Distributive lattices with an operator 205

A. B. Romanowska and J.D.H. Smith / Semilattice-based dualities 225

Alasdair Urquhart / Duality for algebras of relevant logics 263

List of published papers 277

Volume 56 No.3

Vladimir Kanovei and Michael Reeken / Internal approach to external sets and universes (Part III) 293

W. van der Hoek, J. Jaspars and E. Thijsse / Honesty in partial logic 323

Studia Logica **56**: 455–456, 1996.

M. SHIRAHATA / A linear conservative extension of Zermelo-Fraenkel set theory 361

R. GIUNTINI / Quantum MV algebras 393

S. HIROKAWA, Y. KOMORI and I. TAKEUTI / A reduction rule for Peirce formula 418

F. W. KROON / The intrinsic difficulty of recursive functions 427

Contents of volume 56 (1996) 455
